bow SPH

design by david dolcini

Since Roman times, the 'arch' is one of the basics in architecture. It's part of our daily life (even if we don't notice it), and it expresses at the same time deepness, strength and equilibrium. BOW tries to translate the essence of the arch into a minimalistic luminaire. Gravity and balance, combined with the arch, are the other ingredients involved in the design of this product. It is a small family composed by a floor/hanging lamp, and 7 different chandeliers (2, 4 or 6 bulbs).

celeste ceiling

design by glenn marys

A family of suspended and surface mounted fixtures consisting of different sizes of spheres, diffusers and rods that can be combined to create countless variations in the design. Using a single diffuser creates a classic, timeless and minimalistic design, while combining multiple diffusers and several rods create a graphic and playful configuration. Install CELESTE individually, in a series or as a striking group to create a contemporary and luxurious eye-catcher.

celeste suspension

design by glenn marys

A family of suspended and surface mounted fixtures consisting of different sizes of spheres, diffusers and rods that can be combined to create countless variations in the design. Using a single diffuser creates a classic, timeless and minimalistic design, while combining multiple diffusers and several rods create a graphic and playful configuration. Install CELESTE individually, in a series or as a striking group to create a contemporary and luxurious eye-catcher.

circus

design by jean-françois d'or

The feat of managing to combine within a small anodized aluminum body an extreme quality of lighting in a fine and subtle elegance. The CIRCUS collection offers potential for architectural combinations and integrations in both private interiors and public spaces.

With a strong desire to offer a real quality of functional lighting, both direct and indirect, the profiles of CIRCUS compose aerial mobiles combining lightness and strong graphic impact in both classic and contemporary architectures. The softness of the lines and curves harmonize in a range of fitted pieces available in 3 lengths, multiplying the possibilities and the modularity of these mobiles.

circus diabolo

design by jean-françois d'or

The DIABOLO's spotlights are a variation of the CIRCUS collection. Indeed, a revolution of the trapezoidal profile of CIRCUS gives the shape of these spots. They represent the same determination to offer the best quality of light in a discreet, tiny and elegant volume. Alone or in clusters, they energize an architecture and punctuate it with luminous dots.

gisèle

design by nosta

A rod mounted, elegant yet simple design that will enrich your space and gives character to your room. The opal glass distributes the light uniformly and GISÈLE comes in four different finishes: brushed brass, bronze, white and black painted. The minimal style and choice of unique finishes make this light perfect for any interior, classic or modern.

GRID is an innovative modular surface mounted ceiling- or wall system. A very small composition or an infinite network of profiles can be placed from a single electrical connection and provide light wherever required. The strikingly graphic configurations form sculptures discretely and stylishly integrated into the architecture of each space. Available with spots with a 45° beam angle for direct lighting or opal globes for a diffused light without glare.

grid suspension

design by glenn marys

GRID SUSPENSION is a centerpiece fixture with a graphic and energetic look. This contemporary chandelier branches out from a central point in a pure, geometric manner. The powerful LED modules are dimmable and can be equipped with a lens that direct the light downwards, or with opal glass shades that create a uniform and diffuse lighting.

twins

design by glenn marys

Inspired by the candelabra, TWINS is a collection of circular and linear pendants with a classic and sophisticated allure. The high brightness LED modules are placed in couples and direct the light only downwards creating a very intimate and cozy atmosphere. Combine several TWINS to create a chandelier or combine with BOUNCE to play with different light effects.

twins lines

design by glenn marys

Inspired by the candelabra, TWINS is a collection of circular and linear pendants with a classic and sophisticated allure. The high brightness LED modules are placed in couples and direct the light only downwards creating a very intimate and cozy atmosphere. Combine several TWINS to create a chandelier or combine with BOUNCE to play with different light effects.
